The story: These large sheets of polarizing material were made specifically for the optical industry. The manufacturer who made them maintains very high quality standards. Whenever defects, even minute ones, appear in any portion of a sheet, the entire piece is rejected. Thus, these are rejects, because of very minor imperfections, which we can offer at a fraction of their normal price. The polarizing material is sandwiched between two clear sheets of butyrate plastic. It is rigid, easily cut with scissors, and measures .030" thick.
